

Future Focus

Planning your farming future - together

As farming partners, have you discussed your farming future?

Are you on the same page about how to get there?

Future Focus brings sheep and beef farming partners together to achieve their business goals and aspirations – using a team approach to business planning.

The programme equips and supports you to decide what's most important in your future, then use that to plan for your business. It recognises that partners working together is vital to success.

Held over two months, this two-day programme is a chance to take time out to work purely on your business instead of in your business. Reduce stress and share the load by planning and making decisions together.

Guided by our expert facilitators, you'll open up new conversations with each other and learn from other farmers in a similar position.

Programme content

- Develop a business vision and goals – step-by-step
- Create an action plan with specific outcomes
- Systems for staying on track with your plan
- Tools to boost team performance
- How to involve other partners, banks, advisors
- Barriers to success and strategies to overcome them

Future Focus is funded by the Red Meat Profit Partnership so there is no cost to participants.

Open to all sheep and beef farming partners – couples, owner/manager, father/daughter or similar.

Completing Understanding Your Farming Business is not a prerequisite.

Red Meat Profit Partnership (RMPP) is a Primary Growth Partnership programme that is working to help the red meat sector increase productivity and profitability. RMPP works alongside AWDT to deliver the programme throughout New Zealand.
